

PERMIT APPLICATION CONSTRUCTION WATER DISCHARGE

The Anchorage Water and Wastewater Utility (Utility) requires the following information for evaluation of any proposed temporary discharge to the sanitary sewer system.

Dewatering discharge shall only be permitted for waters that do not exceed discharge limits shown in Anchorage Municipal Code (AMC) Titles [26.50.050](#) and [26.50.060](#).

The Utility also requires submittal of a non-refundable permit application review fee. **Applications faxed or emailed will require submittal of the application fee prior to Utility review.**

Submit fee and application to:

Anchorage Water & Wastewater Utility, Field Services
3000 Arctic Blvd
Anchorage, AK 99503-3813
Phone: (907) 564-2762 Fax: (907) 786-5001
E-mail: AwwuFieldServices@awwu.biz

Please note that approval will not be considered or granted if there is an available storm drain discharge location, storm manhole or alternate discharge location. Applicant must demonstrate to the Utility that they have applied for permit to discharge to storm water or other location and provide documentation that such permit has been denied.

Storm Discharge Permit Denied: Yes No Reason:

Copy of Denial Attached Yes No Reason:

Responsible Party for Permit:

Company Name: _____	Contact Person: _____
Email Address: _____	Contact Phone: _____
Mailing Address: _____	Mobile Phone: _____
City: _____	State: _____ Zip: _____

Contractor Information:

Company Name: _____	Contact Person: _____
Email Address: _____	Contact Phone: _____
Mailing Address: _____	Mobile Phone: _____
City: _____	State: _____ Zip: _____

Site Address and/or Legal Description of Proposed Discharge (include a site map, if needed):

Manhole Number(s):

Detailed Explanation of Request and Evaluation of Alternatives:

- Provide a detailed explanation of why discharge to the sanitary sewer system is requested.

- Source Description for the Proposed Discharge (trench dewatering, water main flush, etc).

Approximate Date(s) for the Proposed Discharge:

Start Date of Discharge: _____ End Date of Discharge: _____

Estimated Discharge:

Maximum Pump Rate per Pump: _____ Pump 1 GPM (gallons per minute)
_____ Pump 2 GPM (gallons per minute)
_____ Pump 3 GPM (gallons per minute)
Total Volume in Gallons per Day: _____ GPD (gallons per day)
Total Estimated Volume of Discharge*: _____ Gallons

* Contractor shall report to the Utility the total gallons discharged no later than 30 days from the above stated End Date of Discharge. Contractor will be billed at the appropriate Wastewater Tariff rate per 1,000 gallons discharged to the sanitary sewer.

For Utility Final Billing Purposes:

Contact with Customer:

Total Gallons Provided:

Describe and List the Means and Methods of the Proposed Discharge that will be used to Prevent Sands/Silts, Debris, etc. from Discharging to the Sanitary Sewer:

- Describe type, make and model of baffle/settling tank that will be used.

- Describe screens, separators, filters.

I certify under penalty of law that the submitted information and any follow-up information accurately represents the proposed and actual discharge plan. I also certify that we will comply with the conditions set forth by the Utility in this permit for the discharge to the sanitary sewer (i.e. sediment removal, volume of discharge, etc.). We will also comply with the requirements of the sewer use ordinances, Anchorage Municipal Code (AMC), Titles 26.50, specifically sections 26.50.050 and 26.50.060. We understand that if we do not comply we could be subject to fines of up to \$1,000 per day per violation of Municipal ordinances. We also agree to pay recovery costs by the Utility should there be any violations. Recovery costs will include all Utility expense to restore sewer mains that are affected by the deposition of materials (sand, silt, debris, etc.) from the proposed discharge. I understand that we will be billed for the total gallons discharged to the sanitary sewer based on the current Wastewater Tariff rate, including applicable Tariff fees, at the time total discharge is reported.

Applicant's Signature _____ Date: _____

For an application in conjunction with a Utility Capital Project or Private Development Project, the applicant shall fill out the following information and submit application to the Utility Project Manager for concurrence. Concurrence from a Utility Project Manager is not an approval of the permit. Concurrence signifies the application is compliant with the Capital Project contract and/or amendments or agreements.

Utility Project Information [for information only – not an approval]:

Project Name:	_____	Project Number	_____
		PeopleSoft #	_____
Project Manager	_____	Contact Number	_____
PM Submittal Concurrence	_____	Date:	_____

I approve this proposed discharge plan

(any/all additional requirements listed below shall apply to the approval):

**Utility Approval
Signature** _____

Date: _____

Additional AWWU requirements:

1. Discharge shall not exceed _____ gallons per minute. Contractor will be liable for any sewer surcharge if discharge exceeds _____ gallons per minute.

2. Contractor shall inspect and maintain baffle tank, removing sediments so that no silts are discharged in to Utility public sewer main.

3. Contractor shall report total gallons discharged to the Utility Field Service office when project is complete.

4. Maintain copy of permit on job site.

5. **Permit expires December 31, 20_____.**

Revised: April 8, 2019
