Fire Hydrant Painting Request

The Anchorage Water and Wastewater Utility services all fire hydrants within our service area on a regular basis. Standard yellow painting of the hydrant is completed as necessary. Hydrants are a welcome necessity and keeping hydrants easily visible for use and maintenance by the Anchorage Fire Department and AWWU is our goal.

Here are standardized guidelines for any customer or group wanting to paint a hydrant maintained by AWWU. These guidelines must be followed.

- 1) Approval must be obtained from AWWU.
- 2) All hydrants painted by non-AWWU staff are still subject to repainting with standard yellow paint as necessary. AWWU will paint over the hydrant if necessary. AWWU is not defacing the hydrant if they deem it necessary to paint over it.
- 3) No hydrant can be painted all white, all black, all blue or all red.
- 4) Hydrants with red tops cannot be painted by anyone other than AWWU.
- 5) Hydrants with blue tops cannot be painted by anyone other than AWWU.
- 6) Entities painting hydrants cannot paint the top red, blue, white or black.
- 7) If entities want to paint a hydrant the standard yellow, AWWU will provide the yellow paint.
- 8) Paint to be used must be oil-based paint.
- 9) Hydrant must be properly prepped prior to painting.
- 10) Scan and return this form to Sandy.Baker@awwu.biz

Requester Name: _____ Phone: _____

Email Address _____

Fire Hydrant Number _____ Fire Hydrant Location _____

Proposed Paint Design and Colors (attach another sheet if necessary): _____

By submitting this request for approval, you are agreeing to the guidelines as laid out above. Approval from Anchorage Water and Waste Utility of colors and design is required before any painting can begin. AWWU will confirm approval via email.

For AWWU office use only: Approved: Yes _____ No _____ Date: _____
